

## WILL BEGIN WORK ON TUBE TO JERSEY WITHIN 4 MONTHS

Vehicular Tunnel Expected to  
Pay for Itself in Eleven  
Years.

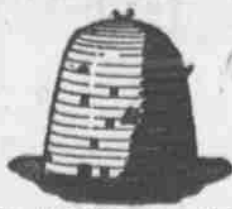

(Special to The Evening World.)  
ALBANY, May 26.—Actual construction of the New York and New Jersey interstate vehicular tunnel will probably begin in September, according to an announcement made here today by John F. Morris, Secretary to Gen. George R. Dyer, Chairman of the New York State Bridge and Tunnel Commission.

According to the plans, Clifford M. Holland, Chief Engineer of the Joint Commission and the Board of Consulting Engineers, there will be two steel tunnels lined with concrete, of the twin tube variety, for two-way traffic.

Freeing the tunnels of poisonous gases from the exhaust of motor trucks and other vehicles proved one of the most difficult problems for the engineering forces. They have evolved a plan of "blowers" after an

extensive study with experts from the United States Bureau of Mines and Yale University. These "blowers" will exhaust the gases and furnish the tunnels with a constant supply of fresh air.

New York's approach to the tunnel will start at Canal and Varick Streets and run from fifty feet below the bottom of the river to 250 at the middle of the Hudson. The Jersey City approach will be at Grove and Henderson Streets. Work will be started on both sides of the river simultaneously.

It is a paradox that the Fifth Avenue shop foremost with the newest gifts and ingenuities is 70 years old. It is no less unique that the shop with the highest level of taste should be the store with the lowest level of prices.
